Prosecution is reopened in view of a new ground of rejection:

Claims 1, 4-5, 7-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "0.5-10 fold mole diclofenac" is indefinite: do applicants intend 0.5-10 fold the amount of sodium diclofenac based on the number of moles of diclofenac present in the preparation? Is there support for this interpretation in the specification?

In claims 8-9 "adhesive basis layer" is indefinite. Do applicants intend an adhesive layer or, perhaps, an adhesive base layer, wherein by base, applicants intend the layer which is adjacent to the skin in a multilayer preparation? Is there support in the specification for the selected interpretation?

No claims allowed.
